

Workshop: Climate risk in the agriculture sector

Date: 09.03.2021

Time: 10.00 – 15.00

Place: Digital

Program

10.00 Welcome

10.05 Introduction to methodology and mural

There will be a short introduction to the methodology we are using in the first session, and in addition we will present the digital board; Mural.

You can read a little more about the methodology in the information leaflet. It is possible to test mural and get acquainted with the tool (link below).

10.30 First session with group work - mapping of impact, exposure, vulnerability and risk

The first session last 1.5 hours, and it is important that the groups take breaks along the way. Here, the groups will work with local climate risk for agriculture in Klepp. Through brainstorming, discussion and mapping, you will try to point out differences form of impact, exposure, vulnerability and risk to agriculture.

12.00 Lunch break

13.00 Summary of the work from the first session and information about the next session

13.30 Second session with group work - solutions and measures (transborder climate risk)

Here we will work with measures and solutions based on what we did in the first session. Except for one group that will work with transborder climate risk. Remember to take short breaks.

14.50 Summary and conclusion
